wePresent 9
High-end Multimedia wireless presentation system with Wi-Fi 802.11b/g/n
WP-920 has advanced features including 1-to-4 screens projection and PC remote control function with high speed video/audio projection, which are unique in the market.

WP-920 contains fantastic functions including 1-to-4 screens projection, remote desktop controlling and Wi-Fi AP Client mode. With 802.11N Wi-Fi standards, it can deliver up to five times the throughput and up to twice the range of previous-generation Wi-Fi gear. It also can play 1080P HD video including H.264 format. Moreover, simply plugging a standard USB keyboard/mouse in the USB port of front panel, the moderator can control all computers in projection easily.

- Compatible to projector / LCD TV / plasma TV / monitor with standard VGA input connector
- Supported OS: Window 2000 / XP / Vista / 7, Windows Mobile 5 and above, Mac OS X 10.5 and above
- Changeable splash screen
- Virtual display support
- Network profile setting and memorizing
- Mob/Show support for Smartphones: PC-less presentation (PiG), media center, photo streaming, screen projection

High Performance Wireless Projection & Audio Projection

With the revolutionary high performance wireless projection with audio, you can easily share the multimedia on the big monitor with friends without cable hassle.

Plug & Show

With the accompanied Plug & Show USB Token, wireless presentation becomes easy! Just link your PCLaptop to wePresent (through WLAN or Ethernet), plug the token into a USB port, and in seconds, your screen will be wireless projected to the connected projector!

4-to-1 Split Screen Projection

With this 4-to-1 split screen feature, up to four PC screens can be projected to one projector in the same time. Thus you can easily do side-by-side comparison from four PC / PDAs to increase meeting productivity!

1-to-4 Screen Projection

With 1-to-4 Screen Projection, you can projection PC content out to up to 4 screens at the same time through wePresent devices. 1-to-4 Screen Projection feature functions both under presentation mode and video mode.

Conference Control

The wePresent Conference Control features a web-based administrative tool, making it incredibly easy for administrator to control and manage the conference participants. With clear headings for conference participants, presenting sequences are managed in turns by a touch of a button.

Macintosh(Mac) wireless Projection

wePresent supports Mac client connected and projected wirelessly. By launching the Mac client software that stored in accompanied USB token, wePresent provide the same experience to Mac user to utilize the wireless presentation feature.

HD video Streaming

wePresent has the ability to deliver high quality animation screens for XGA and WXGA resolutions in 32-bit color. It also supports playback function for popular video streaming format in MPEG1, MPEG2 and MPEG4, Divx 3/4/5, Xvid, WMV9, H.264.

SNMP Manager

wePresent equips the SNMP management feature to make the device management easier. By enabling the SNMP (Simple Network Management Protocol Version 2c) Manager, the devices could be managed and configured through network for each or bunch.

Changeable Splash Screen

You can use the application "Screen Image Background Maker" to change the Splash Screen. Design the image with message you would like to present, upload it through web control page, and you could have customized starting page.

AP-Client Mode

You can enable the AP-Client Mode function to let wePresent join the existing Access Point through Wi-Fi. This feature provides the flexibility of wireless network deployment in enterprise environment.

Remote Desktop

Plug standard USB keyboard or mouse into the USB port in front panel of wePresent device, you can control your PC remotely. You don't have to stand still aside of PC or wePresent device, and it makes your presentation easily and freely.

910

wePresent 9
Multimedia wireless presentation system with high speed projection
WP-910 adopts multimedia projection technology developed by Awind which provides high speed projection with audio to make your presentation professional and entertaining!

WP-910 adopts multimedia projection technology developed by Awind which provides high speed projection with audio to make your presentation professional and entertaining! Its driverless design (PnS) lets every guest quick and easy access without any installation, and zero-configuration required from IT staffs. The Conference Control feature provides an easy web interface for meeting mediators to quickly switch among multiple PCs. Moreover, it is also an HD video player to playback 1080p videos on big screen!

- Compatible to projector / LCD TV / plasma TV / monitor with standard VGA input connector
- Supported OS: Window 2000 / XP / Vista / 7, Windows Mobile 5 and above, Mac OS X 10.5 and above
- Changeable splash screen
- Virtual display support
- Network profile setting and memorizing
- Mob/Show support for Smartphones: PC-less presentation (PiG), media center, photo streaming, screen projection

Plug & Show

By equipping with "Plug and Show Token", wePresent brings an immediate and convenient access to any type of projection. Simply connect your PCLaptop to wePresent and insert Plug and Show token, images are on their way!

4-to-1 Split Screen Projection

4-to-1 split screen projection creates an ideal solution to dramatically increase the productivity of your daily meetings. Not only this feature makes it absolutely easy to work with up-to 4 applications side by side, but also helps to make maximum use of your high resolution projector. Most importantly, the great using experience brings 4 times of enjoyments and costs for only the price of single projector.

Conference Control

The wePresent Conference Control features a web-based administrative tool, making it incredibly easy for administrator to control and manage the conference participants. With clear headings for conference participants, presenting sequences are managed in turns by a touch of a button.

Video Stream

wePresent 820 has the ability to deliver high quality animation screens for XGA and WXGA resolutions in 32-bit color. It also supports playback function for popular video streaming format in MPEG1, MPEG2 and MPEG4, Divx 3/4/5, Xvid, WMV9
