

# GroupSTATION & HuddleSTATION

**When You Need More than Videoconferencing**

Connecting with your laptop or tablet has never been easier

# Vaddio Presents the **Group**STATION and **Huddle**STATION

**Bringing your own laptop or tablet into a meeting room has never been easier.**

Plug your computer or tablet into the convenient MicPOD DOCK located on the table and you are ready to go. All your computer software applications are now room-enabled to take advantage of the professional audio and video room components built into each system.

Connect with remote staff via Microsoft Lync, share your PowerPoint presentation to local colleagues or stream a training video from YouTube. Connect to a fellow Skype video call or join a meeting online with WebEx. What about a basic audio conference call? No problem. Both come with integrated VoIP audio conferencing systems that sound significantly better than those cheesy old speakerphones.

Vaddio's GroupSTATION and HuddleSTATION let you do it all. With your own laptop or tablet.

Say goodbye to using fuzzy webcams. Say goodbye to tinny computer audio. Say goodbye to piles of remotes in your meeting room. Say hello to professional-grade audio and video for your laptop or tablet. Made easy.

-- 8:00 AM --

## William brainstorms with his engineering team using a whiteboard app on an Android tablet

Easily share whiteboard notes locally in  
the room or with partners worldwide.

-- 9:30 AM --
